

# Adjustable Sling Bag

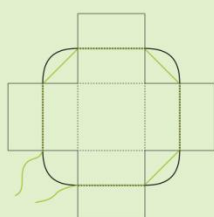

女士在被单肩包的时候很多时候会用手提,而单肩包的肩带对于手提显得太长,致使包包接触地面,“Adjustable Sing Bag”的背带上加了一个小小挂钩,很简单的将背带和手提袋之间进行切换,同时,变为手提袋的背带由原来的一层变为三层,增加手提时候的抓握触感。Usually when women carrying a lady's bag they will use the straps, but sometimes the straps of single shoulder bag are too long for women to grasp, and lead the bag to touch ground. “Adjustable Sing Bag” adds a small hook on the strap, so that it can be transformed between bag and handbag. The transformed handbag would change from one layer to three layers as well, this can enhance the grasping friction when being held.

# EASY STORAGE

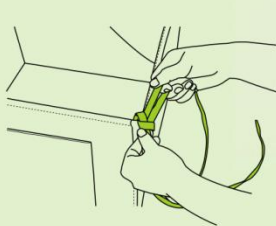

展开示意图

上下双面口袋

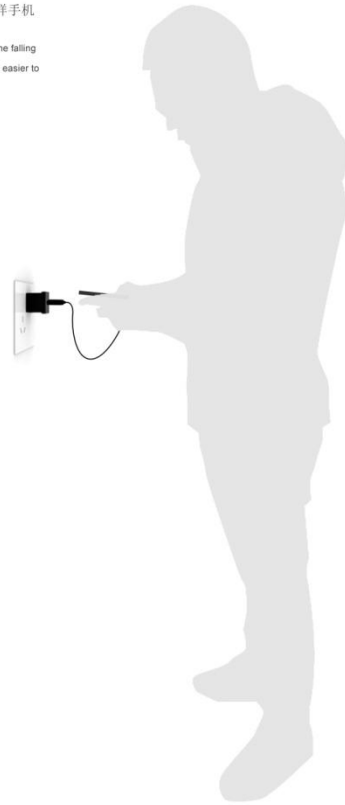

松开边缘固定绳示意图

当我们想野炊度过一个愉快的周末的时候,会为要携带的零零碎碎的野炊物品而烦恼。“easy storage”像一个大收纳箱能够将野炊时候要用的食物、餐具和其他用具收纳其中。在野炊的时候,可以通过松开固定四面的绳子将其展开成一个平面用做坐垫,“easy storage”立面的双层结构能够使其展开之后面积更大。同时,我们可以根据自己的需要将其折变成一个桌子,它侧面的两个方向开口的收纳袋可以适合不同的使用状态。另外,“easy storage”在不使用的状态能够折叠成一个平面放在后备箱或者家里不占空间。这些很容易就能够实现的功能变化使“easy storage”成为提高野炊出游时生活质量的必需品。

## Safe Changer

当手机墙上的接线孔充电时，会没有地方放手机。凸的“安全凸台”可以使手机放在充电器上，同时这样手机就可以一面靠着墙，同时凸台设计防止手机滑落下来。与此同时，凸使“安全规则”更容易使充电器被拔出来。  
There is no place to put the mobile phone when you charge it in the patch board on the wall. The convex on the "safe changer" can stop the mobile phone falling while another side stands against the wall. In addition, the mobile can be charged when it is used. At the same time, the convex makes "safe changer" easier to pull out.

## Bamboo hanger

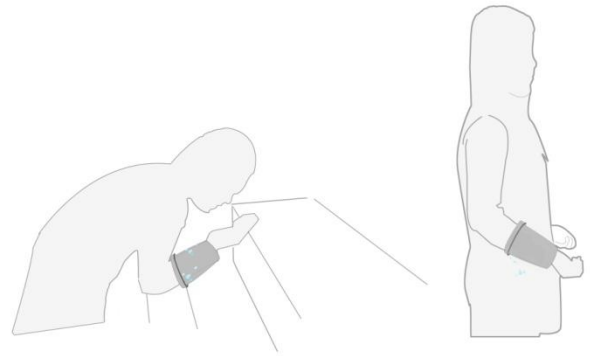

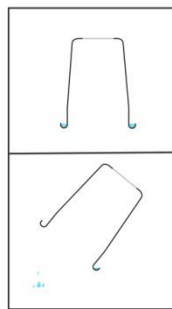

竹制衣架双层设计能够让让衣服干的更快，同时，采用以生长迅速的禾草类植物作为材料，减少生活垃圾，节能环保。  
Double bamboo hanger makes the clothes dry faster. At the same time, taking material from bamboo growing fast, which is environment-friendly.

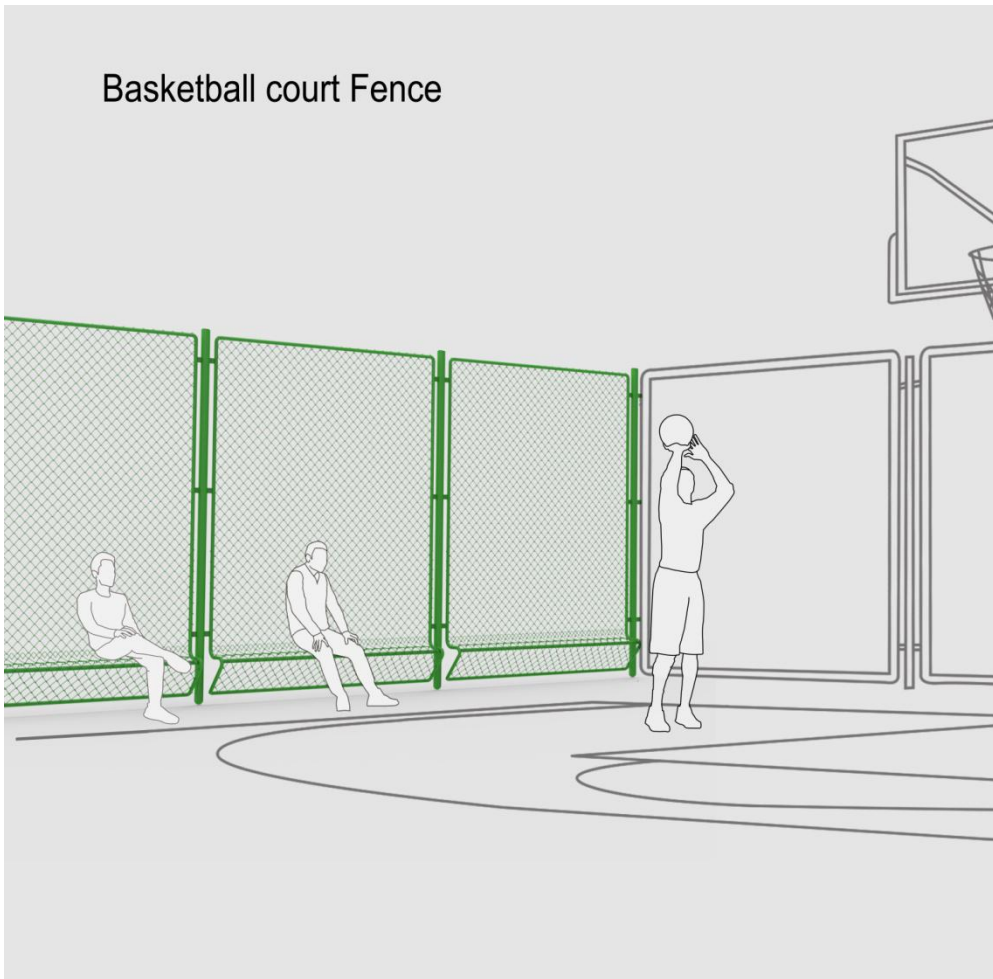

# Oversleeve

在严冬洗脸的时候经常会把袖子打湿在这个时候又不可能去换衣服，这样是很难忍受。将橡胶材质的 oversleeve 罩在袖口上，手腕的地方松紧收口，上端有个凹形槽防止水流到手臂上。  
The sleeves get wet when we do washing in the winter and it is impossible for us to change clothes. However, it is hard for us to endure the wet clothes. "Oversleeve" made of the environment friendly waterproof material can be covered on the sleeve. The wrist is tighten up and there is a concave groove on the other end which prevent the water from flowing into the arm.

# Basketball court Fence

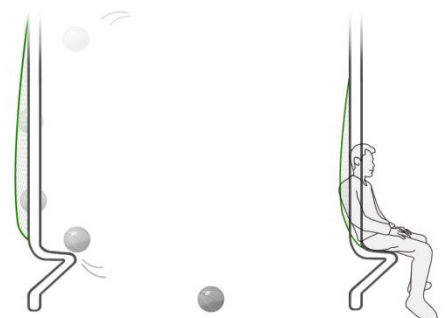

## Problem

1. Due to long period of people leaning and sitting on, the integrity of the retainer is often compromised.
2. After hitting on the retainer, the balls won't roll far, because the net is made of soft materials, which cause athletes to walk to the balls to pick them up.

## After

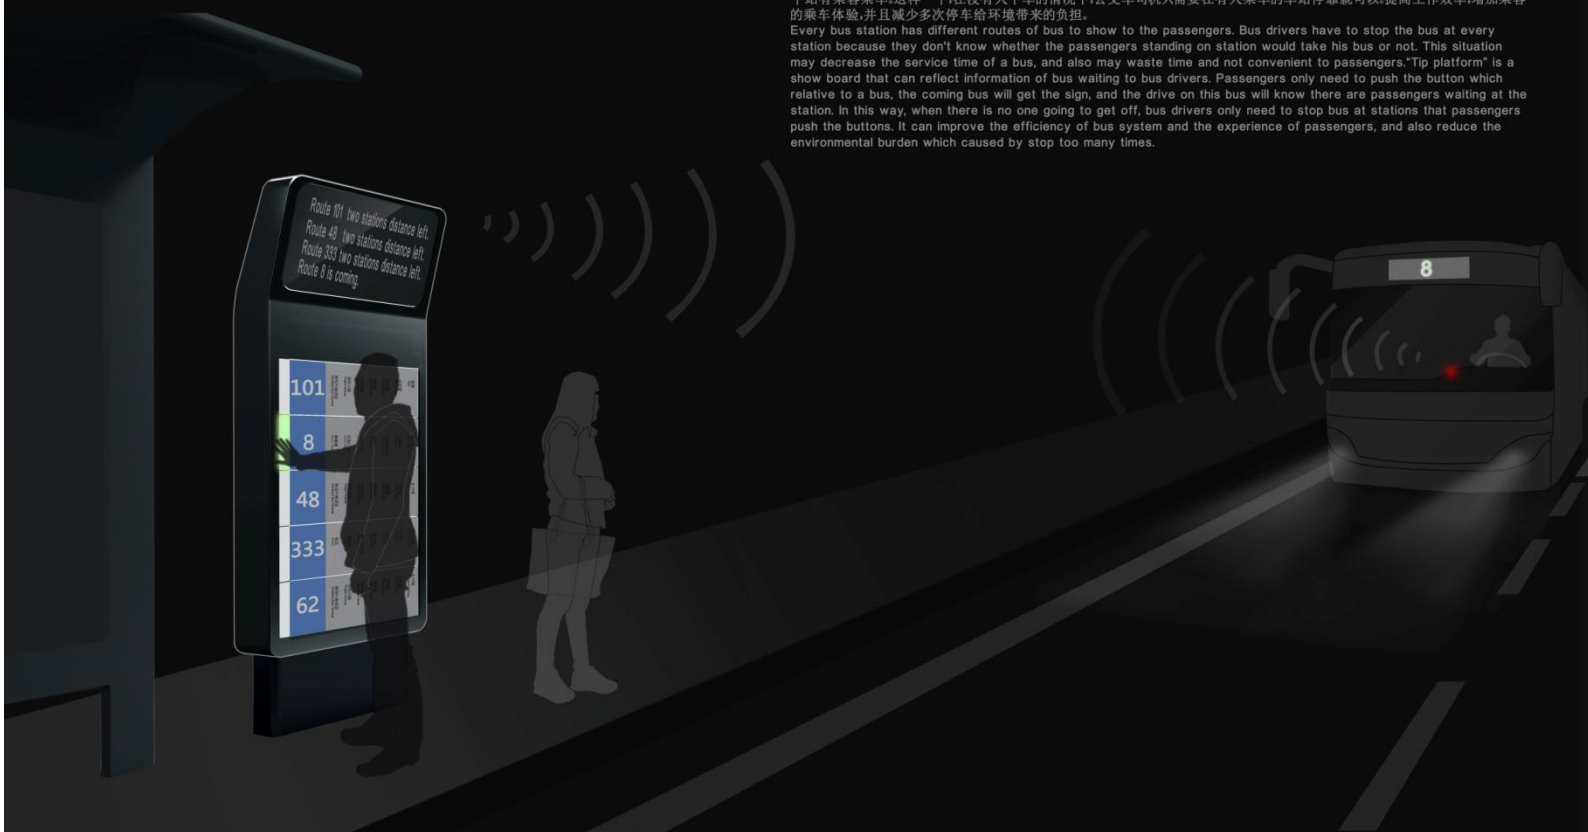

人在疲惫的时候就会依靠身边的支撑物，由于这一人的习惯，篮球场的围网使用一段时间之后就往出现变形的情况。再者，打球的时候球员最不乐意但又必须做的就是捡球，跟着球跑。综合两者的考虑将篮球场的围网造型稍作调整以解决这两个问题。

## Tip platform

每个公交车站均设有不同路线的公交车,当各个路线的车经过站台的时候,公交车司机不知道是否有人要乘坐的该路线车辆,所以需要每站都停靠,这会导致车辆使用寿命的缩短,同时会浪费时间给乘客带来不便。“Tip platform”是一个能够给司机信息提示反馈的站牌。乘客在候车时只需要按下与他乘坐的班次相对应的按钮,将要到来乘坐的车便能收到信号,提示司机这个站有乘客乘车。这样一来,在没有人下车的情况下,公交车司机只需要在有人乘车的车站停靠就可以,提高工作效率,增加乘客的乘车体验,并且减少多次停车给环境带来的负担。

Every bus station has different routes of bus to show to the passengers. Bus drivers have to stop the bus at every station because they don't know whether the passengers standing on station would take his bus or not. This situation may decrease the service time of a bus, and also may waste time and not convenient to passengers. “Tip platform” is a show board that can reflect information of bus waiting to bus drivers. Passengers only need to push the button which relative to a bus, the coming bus will get the sign, and the drive on this bus will know there are passengers waiting at the station. In this way, when there is no one going to get off, bus drivers only need to stop bus at stations that passengers push the buttons. It can improve the efficiency of bus system and the experience of passengers, and also reduce the environmental burden which caused by stop too many times.

## 低地板社区巴士 Low-floor community buses

本着使造型更加整体统一的原则,侧面车窗玻璃和乘客上下车门采用统一的深色,是车身更加整体。

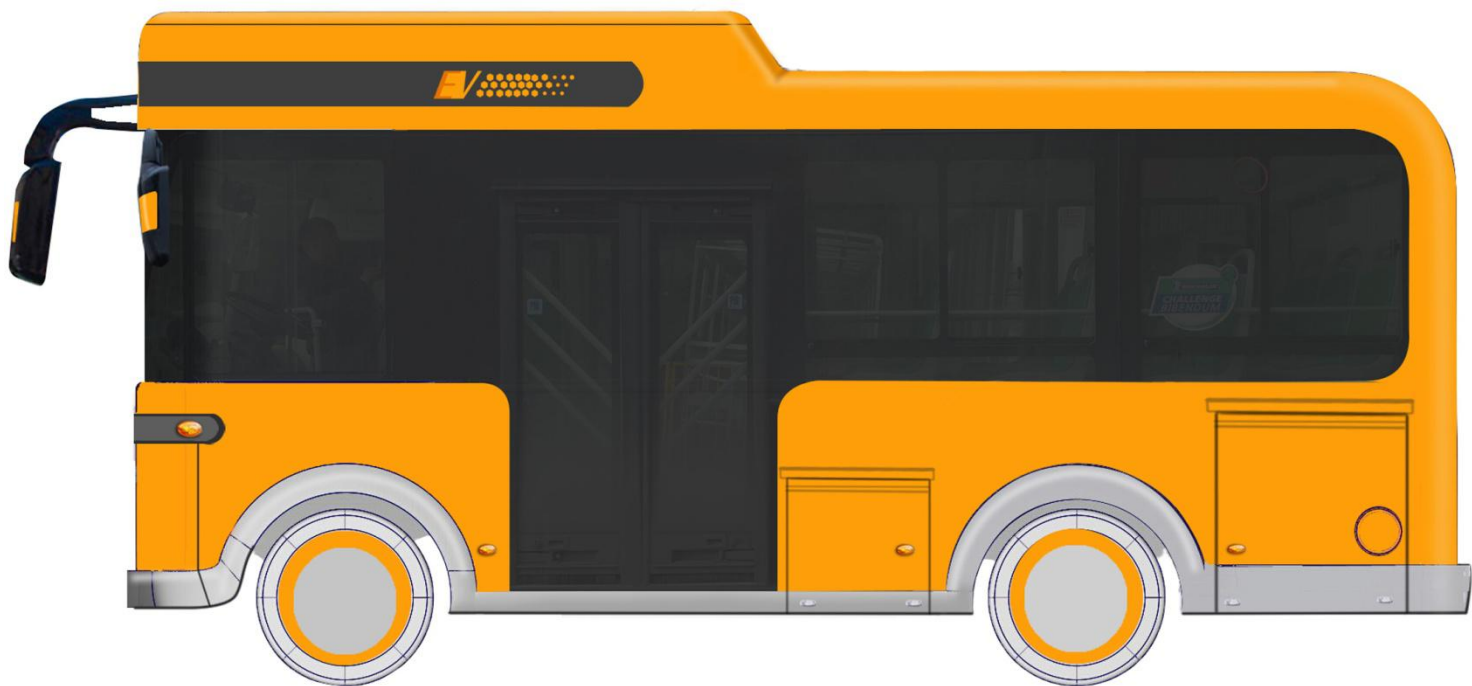

Glass side windows and the passenger door and down a dark uniform, the body is more whole.

## Original Bamboo Chair

采用环保 可快速再生的竹子作为主要材料，搭配亚麻绳作为装饰辅助，制作的公共场所座椅。选用粗细均匀的细竹子，利用了原竹中空、有韧性的特点，将其固定在等间距打孔的木板上。固定方式利用最简单，最自然的契合方式体现了可持续性设计的理念。同时结合实木板的强度大不易变形保证椅子不变形，该座椅能同时承受3-4个成年人的体重，将原竹的韧性和实木板的强度二者的结合完美体现。

The public chair is made of the original bamboo which is environment friendly and regenerated. Uniformity diameter bamboo is fixed in wooden planks, which takes advantage of the bamboo hollow and elastic characteristics. The choice of thickness uniformity of thin, bamboo which is fixed on the pitch punch, etc. Wood. Fixed way to use simple corresponding relationship, the most natural way to embody the concept of sustainable design.

### Design Description

This is a high-tech style robot-vacuum design. The robot concept comes from rockets. It looks like a two-foot robot which is sitting on the floor and it can be considered as a waiting for getting Rocket. It can pour rubbish by itself. It hear from you, get your command and do the things you told it. Imagine you get up in your room. It follows you when you are cleaning the room. Children who are fans of Robot mobile will fall in love to soon.

### Design

I just don't know how to describe the design. It's a just a conveying thing to write this kind of description. The main concept of the design is "good use". The picture describes the use of the new charger. I give the charger a special feeling. I like the bronze plates around the legs but. The designer take the help of the legs into consideration. The colors of the bronze plates and the taken bridge make the cellphone feel better. If you hold the cellphone, you can grasp the hand-plate's bridge and touch the hard and cold bronze plate. It must be fun. The cellphone can stand on the charger. So you can watch TV through it and get rid of the worry from short-energy.

Now look for a charger that you cellphone can intake from it. It really makes your life beautiful. You deserve it.

## FOLD-ABLE Safe holder design

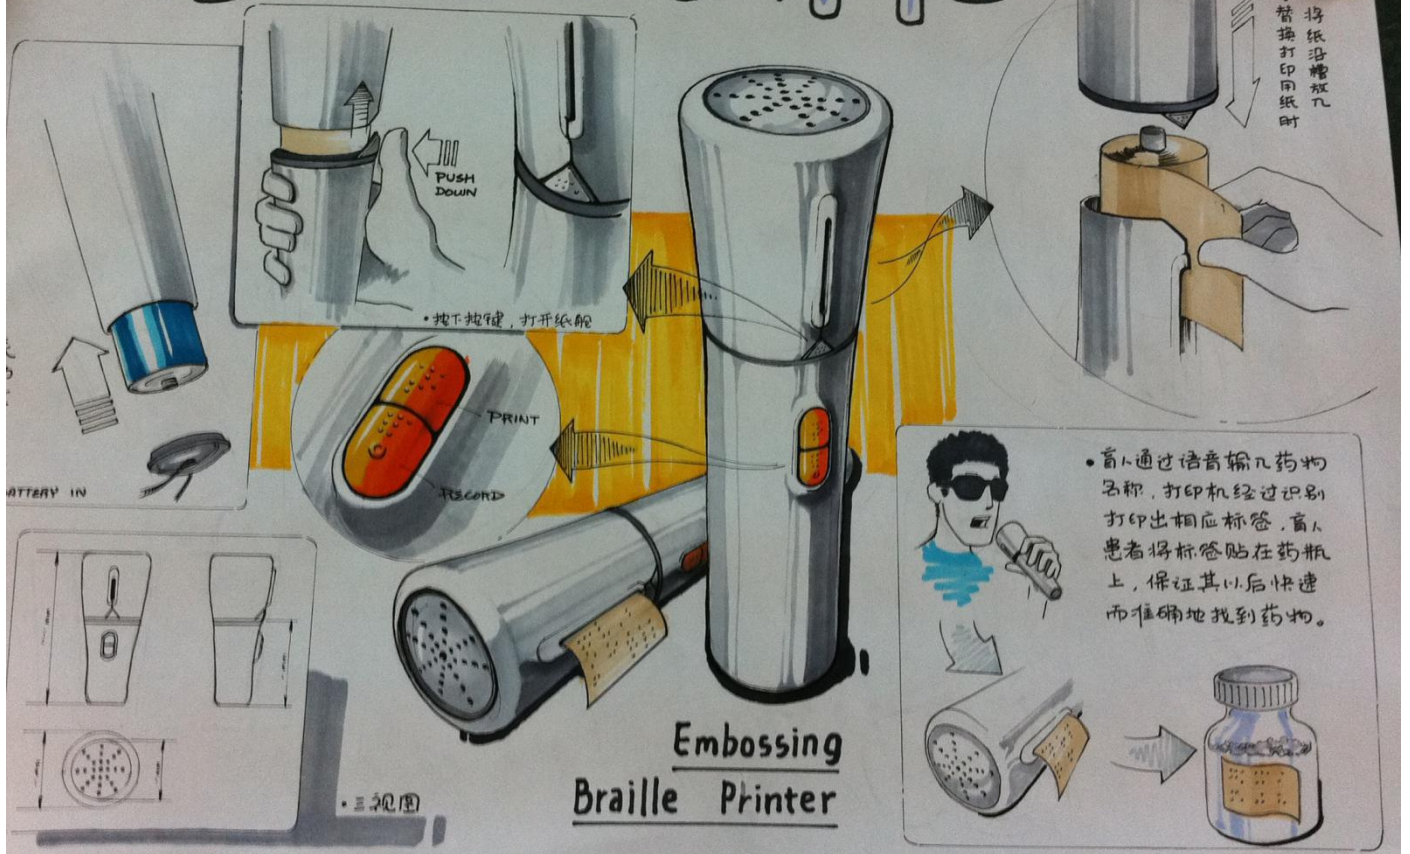

### Design Description

It confuses me again when I decide to write the design description. I just wonder what in the world should I draw on the paper. Something beautiful was made in the sake of beauty, life-repeating or just imaginable. I don't know what I draw on the paper. So I can't say anything about it. I just do it for the sake of formality, including what I am writing now. The so-called "Design Description". The only thing I can receive from it is that my English can be correct.
